Triarco's Aminogen® Increases Plasma Amino Acid Levels Over 100%!

WAYNE, New Jersey - Wednesday, April 12, 2006 -- According to the results of Triarco's most recent Aminogen® clinical trial, it was proven that Aminogen® increased plasma amino acid levels over 100%! This study comprising of 41 males was designed to find out whether the presence of Triarco's patented ingredient Aminogen® makes a difference in the breakdown, absorption and utilization of whey protein...and does it ever.

Be sure to look for Aminogen® on the labels of quality products like Optimum Nutrition's Pro Complex protein formula which contains an explosive 250 mg. of Aminogen® per dose!

Amateur Super Heavyweight Bodybuilder, Kenny Gipson had only good things to say about Aminogen®!

"I switched to Pro Complex because it had the highest dose of Aminogen® that I could find in a protein powder. Now that I made the change, I feel a lot stronger and my workouts are much better. My strength and weight have gone up and I have noticed a lot less stomach bloating. My food also digests more quickly and regularly. The combination of a high quality protein with large amounts of Aminogen® makes me feel like I'm getting a lot more out of my workout. Bottom line, Aminogen® works, and I feel like I am in the best shape of my life!"

Get Bigger, Stronger...Faster™ with Aminogen®.
